---

## Objective

To work as a Junior Full-Stack Developer, applying knowledge in React, Node.js, Next.js, and TypeScript, collaborating with multidisciplinary teams, and contributing to innovative projects in agile environments.

---

## Summary of Qualifications

- Full-Stack Developer with experience in freelance and academic projects, proficient in React, Next.js, Node.js, PHP, and MySQL.
- Knowledgeable in agile methodologies (Scrum) and version control tools (Git).
- Proactive, communicative profile focused on delivering efficient solutions, with the ability to manage deadlines and adapt technologies.
- International experience with an intensive English course during a cultural exchange program in Dublin, Ireland, enhancing communication skills and fluency.

---

## Professional Experience

### Freelance Web Developer

November 2023 – November 2023 | São Paulo, Brazil

- Developed the responsive homepage for an e-commerce site for JVJ clothing store, delivering the prototype in just two days for a client's thesis presentation.
- Created the store's visual identity aligned with the client's proposal, using jQuery, Bootstrap, and CSS to ensure usability and modern design.
- Managed time efficiently and prioritized technologies to meet the deadline without compromising the final product quality.

### Freelance Web Developer

April 2022 – September 2022 | São Paulo, Brazil

- Led the full development of a web system for Cadmo SA dental clinic, including design, frontend, backend, database, and technical documentation.
- Applied PHP, MySQL, JavaScript, jQuery, CSS, HTML, and Git to deliver a robust and scalable system within the stipulated deadline.
- Conducted system planning and analysis to ensure alignment with client needs and product quality.

---

## Projects

### Black Nib – Modern Blog Platform

The full-stack blog platform was developed with React 18, Node.js, Express, MongoDB, and Docker, using SSR, JWT authentication, and scalable architecture.

- Features include server-side rendering, dark/light theme, infinite scroll, category organization, and featured posts.

- Database integration with Docker, secure authentication, and advanced SEO.
- Visit: [blog-black-nilb.vercel.app](https://blog-black-nilb.vercel.app) | Code: GitHub

### **Opala Filmes**

Web platform for movie voting and management, built with Next.js, React, Firebase, and TailwindCSS.

- Real-time voting system, random movie selection, watchlist management, and tracking of watched movies.
- Responsive interface, dark/light theme, SSR for SEO and performance.
- Visit: [opala-filmes.vercel.app](https://opala-filmes.vercel.app) | Code: GitHub

### **Doces da Thay**

Frontend for a sweets e-commerce, focused on accessible design and intuitive navigation.

- Developed with JavaScript, jQuery, and Bootstrap to ensure responsiveness and usability.
  - Implemented product gallery and user-friendly interface.
